

Third generation surveillance system

Hyper Video Matrix

Clicking the object on the digital map, gives access to video stream from both fixed and PTZ cameras.

Red markers show target on fixed and PTZ cameras and digital map

Video client

Easy system management and automated object tracking with mobile solutions

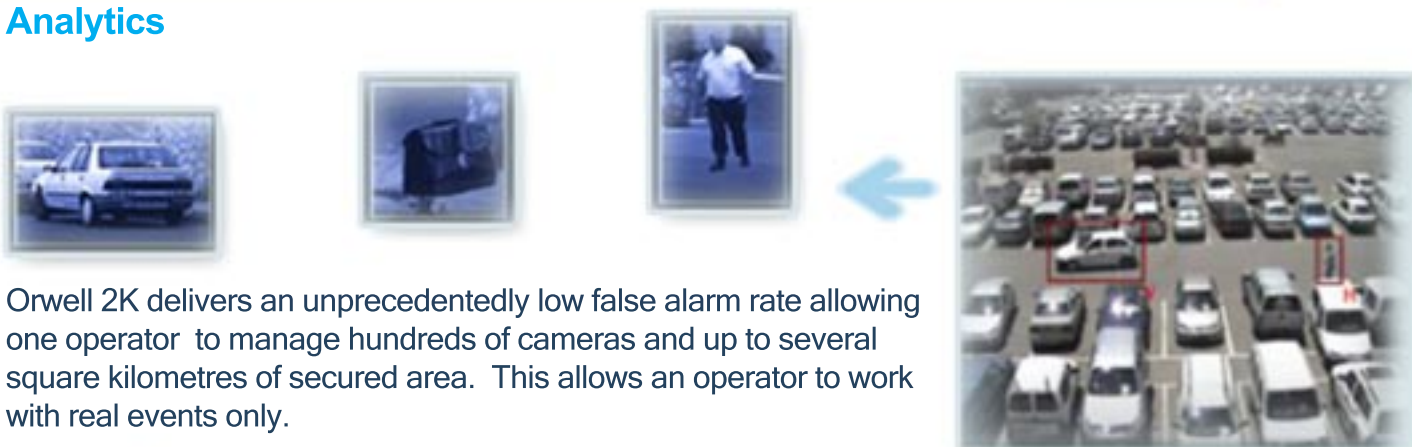

Network Video Recorders

All video, events and operator activities are recorded into searchable database.

Advanced features include pre and post alarm playback with simultaneous multi camera playback

Analytics

Orwell 2K delivers an unprecedentedly low false alarm rate allowing one operator to manage hundreds of cameras and up to several square kilometres of secured area. This allows an operator to work with real events only.
