ORWELL-R

Orwell-R object perimeter and territory radar system

Orwell-R perimeter and territory radar system provides 24/7 all-weather smart security of a perimeter or larger territory through the use of state of the art radar technology. Orwell-R allows for 360 degrees coverage of a programmable sector and detects moving targets at a distance of up to 1000 meters for people and up to 1500 meters for vehicles.

System features:

- Can analyze hundreds of radar feeds simultaneously on a single network system;
- low radiation power;
- ethernet and wireless interface;
- identifies and archives targets, alerting operator if preset event types occur;
- high performance in all weather conditions;
- can track targets between different radar stations and cameras;
- the system can be set to alarm on specific events or targets;
- network capabilities for monitoring from anywhere through computer or hand held terminals;
- integration is available with other technologies for multi-layered security solutions.
