

ORWELL 2K LPR

This system offers state of the art license plate recognition coupled with vehicle type recognition for an additional level of accuracy.

Orwell 2k LPR combines state of the art license plate recognition analytics with vehicle type recognition for increased accuracy. Orwell 2k LPR is used in parking lots, border crossings, city streets, etc., to support existing security systems, and track activity.

System features:

- Thousands of camera feeds analyzed simultaneously on one network system;
- identifies and archives targets, alerting operator if preset event types occur;
- ignores shadows, movement of trees and grass, change in illumination, camera movement, etc.;
- network capabilities for monitoring from anywhere through computer or hand held terminals;
- integration is available with other technologies for multi-layered security solutions;
- minimum 15 frames per second.
